## ***OTHER REBATE PROGRAMS***

### **ABOUT THE REBATE PROGRAMS**

The purpose of these other rebate programs is to help our property owners reduce their water use by replacing less efficient irrigation controllers, toilets, and washing machines. If you currently have a landscape controller that is not considered “Smart”, a toilet that uses more than 1.28 gallons of water per flush, or a washing machine that is not considered “High Efficiency” you may be eligible for a rebate from the City of Bullhead City.

### **ELIGIBILITY**

- A. **Authorization to Proceed:** Before removing the controller, low efficiency toilet, or low efficiency washing machine, an application must be submitted to the City and the applicant must participate in a pre-conversion site inspection. Starting without City approval will make the conversion ineligible.
- B. **Customer Eligibility:** The property must be located within the city limits of Bullhead City. The applicant must be the property owner. The property that is the subject of the application may receive only one of each rebate type (irrigation controller, high efficiency toilet, high efficiency washing machine, and turf) annually.
- C. **Qualifying Purchases:** “Smart” irrigation controllers may be purchased from anywhere. “High Efficiency” Toilets and “High Efficiency” washing machines must be purchased from a business located within the City of Bullhead City.

### **TERMS OF THE REBATE**

- A. **Annual Incentive Amounts:** For this budget year the City has designated \$250,000 to be used for the Rebate Programs. The City’s fiscal year is July 1 through June 30. Projects are subject to the availability of funds and must take place during this budget year.
- B. Irrigation Controller to “Smart” Irrigation Controller — \$175 - See next page for approved list of smart irrigation controllers.  
Low Efficiency Toilet to High Efficiency Toilet — \$50  
Low Efficiency Washing Machine to High Efficiency Washing Machine — \$150
- C. **Important Timelines and Deadlines:** Within 6 months of approval of your application, you must complete your project and notify the City. The City will inspect completed projects for compliance.
- D. **Rebates:** **PLEASE SAVE ALL OF YOUR INVOICES/RECEIPTS.** The City must have the invoices/receipts to offer the rebate. A check will be issued to property owner approximately 30 days after the final inspection.
- E. **W-9 Form:** A signed W-9 form will be required with the application.

## ***OTHER REBATE PROGRAMS***

### **List of Approved Smart Irrigation Controllers**

Below is a list of smart irrigation controllers that qualify for the rebate. Simply go to the retailer of your choice, select the smart irrigation controller that best suits your needs.

Alex-Tronix Controls: Universal Smart Module

Baseline: Soil Moisture Sensors

Blossom: Smart Watering Controller
